Community Hospital of the Monterey Peninsula (CHOMP)

Client: HOK

Location: Monterey, CA

Project Type: Entry Pavilion Parking Structure

Project Overview:

A new 220,000 square foot, three (3) story underground parking structure with a Plaza level at grade. The facility will accommodate approximately 400 automobiles. In addition to the normal parking structure facilities and support spaces, there will be two office spaces for security functions and one space for telephone equipment.

Role In Development:

Silverman & Light, Inc. is provided complete electrical engineering and lighting design services for this project. Our work included new electrical service, power, emergency power distribution, fire alarm/life safety systems and telecommunication/data systems.

We are currently providing engineering and lighting design for the renovation and addition of several buildings for the hospital complex.
